

## Be Wise. Care for Your Eyes.

Caring for your vision doesn't begin and end with eyeglasses, contact lenses, and corneal modification surgeries like Lasik. There are many things you can do to maximize and protect the visual tools you currently have.

### Free Eye Exams

Everyone deserves the gift of quality vision. An essential component of healthy vision is a regularly-scheduled comprehensive eye examination.

Optometrists are specially trained to detect and treat problems and conditions of the eye and can help you get the most from your vision.

**Ask about our free  
back-to-school frames!**

# Vision Precision Begins Here.

## Comprehensive Eye Exams

An essential component of healthy vision is a regularly-scheduled comprehensive eye examination.

## Eyewear and Contacts

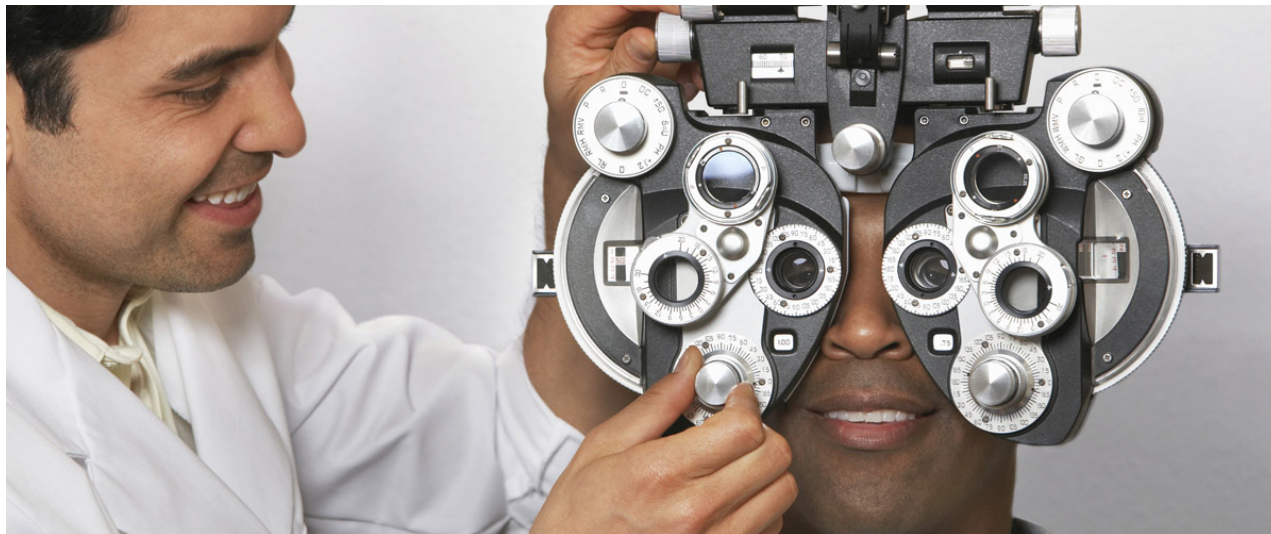

HealthLinc offers several stylish options for prescription glasses and sunglasses, from basic economy frames to high-end designer options.

## Retinal Evaluations

Early detection of diabetes, cataracts, and glaucoma are key to preventing eye problems down the road.

## Lasik

Laser vision correction surgery may be right for you. We are able to correct myopia, hyperopia, and astigmatism.
